Dear Dr. Hennon,

As we discussed a couple of weeks ago, I have listed several questions below, which I would like detailed answers to. As much consideration and discussion took place concerning the addition of soccer as an additional sport. I'm sure all of these questions were considered and answers should be readily available.

What is the number of male students per grade in the 9th through 12th grades?

What is the number of female students per grade in the 9th through 12th grades?

How many male students in the 9th through 12th grades participate in a fall sport? Please separate by sport.

How many female students in the 9th through 12th grades participate in a fall sport? Please separate by sport.

What co-curricular activities conflict with fall sports?

Please list the number of male students in the 9th through 12th grades that participate in these co-curricular activities. Please separate by activity.

Please list the number of female students in the 9th through 12th grades that participate in these co-curricular activities. Please separate by activity.

What are the exact costs of each fall sports program including coach salaries, athletic supplies, etc. (Many of these items were left off of the Athletic Budget)?
